Junior developer since 2023, working in .NET with C#, ASP.NET Web Forms and SQL Server on a platform used by about 43 client companies to manage safety and operations. I also handle part of the infrastructure: moving file storage to the cloud on Azure and monitoring disk space and backups. I build software with Claude Code every day. I come from logistics and I am studying Systems Analysis and Development at Fatec Jundiaí.

Experience

Cautus.Digital (Digitalss platform)

Aug 2023 to present

Junior software developer, remote

Platform with modules for contractor management, document management, work permits, inspections, incidents and workplace safety committee (CIPA) elections, among others.

- Build and maintain features with ASP.NET Web Forms (ASPX), C#, SQL Server and JavaScript. The team develops with Anthropic's Claude, and I use Claude Code every day.
- Migrate client attachments from server disks to Azure Blob Storage, moving storage to the cloud, and monitor servers on Azure.
- Monitor disk space and SQL Server database backups for about 43 clients, running cleanups and shrinks when needed, and maintain jobs in Windows Task Scheduler.
- In 2024, spent 5 months on-site at P&G in Louveira (Brazil) implementing a logistics automation system: truck drivers check in on a tablet when they arrive, the system alerts the team to pick the load and, once it is ready, messages the driver to pull up to the dock and load.

Bignardi

Sep 2019 to Nov 2021

Junior logistics analyst, Jundiaí (Brazil)

Shipment scheduling for sales orders, logistics and reverse logistics, using the TOTVS ERP.

Personal projects

PeJu Finanças

JavaScript, Firebase, Node.js, Gemini

Personal finance web app used by me and my family. Google sign-in, real-time sync, offline mode, yearly report, OFX/CSV statement import and end-to-end tests with Playwright. In progress: an AI-powered WhatsApp bot that logs expenses from text or voice messages.

AutoNF

Python, Flask, SQLite, Playwright

Desktop app that issues Brazilian service invoices (NFS-e) through the tax authority's official API, using an A1 certificate and mTLS. Encrypted backups, a security audit with 15 fixes and 175 automated tests.

Education

Systems Analysis and Development

Fatec Jundiaí, evening program. Jul 2024 to Jul 2027, in semester 5 of 6

Programming Logic (C)

Senac São Paulo, Jun to Aug 2023

Discovery, intro to programming

Rocketseat, Jan to Mar 2022

Languages

Portuguese native

English advanced

Skills

.NET	C#, ASP.NET Web Forms, .NET Framework, SQL Server, JavaScript, HTML, CSS
Infra and cloud	Microsoft Azure, Azure Blob Storage, server, disk and backup monitoring, database maintenance, Windows Task Scheduler
Projects	Python, Flask, Node.js, Firebase, SQLite, pytest, Playwright, Git
AI	Claude Code and Claude (work and projects), Google Gemini API
Soft skills	Communication, proactivity, teamwork, organization, continuous learning
